Education

Certificate in Full-Stack Web Development

Dec. 2020

University of North Carolina at Chapel Hill, Chapel Hill, NC

MAT (Master in the Arts of Teaching) in Education

May 2018

University of North Carolina at Chapel Hill, Chapel Hill, NC

BA in English

May 2017

University of North Carolina at Chapel Hill, Chapel Hill, NC

Technical Skills

- HTML, CSS, Bootstrap, JavaScript, jQuery, Node.js, Media Queries, React Js, Express, GIT, APIs, JSON, REST, AJAX, CLI, MySQL, MongoDB, & Handlebars JS
- Google Classroom, Moodle, Kahoot
- POS (Point of Sale) Software, including Clover and Foursquare
- Windows/Mac OS, Microsoft Office (Excel, Word, & PowerPoint), Google Analytics, Adobe Photoshop

Created Applications

- Dog Days, Inc.
 - An application for users to search for a dog to adopt based on its breed type (Labrador, golden retriever, etc.), breed group (toy, terrier), and/or temperament within his/her state of residence. The user is then provided with dogs to choose from and brought to the website to officially adopt the dog if s/he so chooses.
 - Technologies used: HTML, JavaScript, CSS, Bootstrap, Font Awesome, jQuery, PetFinder API, thedogAPI
 - Dog Days Application URL: <https://vkalaparthi.github.io/2020-Project1/>
- Palate Prowler
 - An application for users to create, view, and delete food trucks so that they may have a chance to find good food and safe company in the times of COVID-19. Users are able to create a profile, creating a password which is encrypted in the system, and use these log-in credentials to access and use the application.
 - Technologies used: HTML, JavaScript, jQuery, CSS, Handlebars, MySQL, Moment.js
 - Day-to-Day Planner URL: <https://github.com/WasteOfADrumBum/Team-Project-II>
- Weather Dashboard
 - An application which allows users to check the weather anywhere in the world. Upon searching, the location is saved to local storage and stored as a clickable object for the future. Users then see the weather for the current day in particular, as well as a 5-day forecast for their desired location.
 - Technologies used: JavaScript, HTML, Moment.js, OpenWeatherMap API
 - Weather Dashboard URL: <https://jtbataille.github.io/Weather-Application/>

Work Experience

High School English Teacher

July 2019-present

Southern Lee High School, Sanford, North Carolina

- Manage workshops to target specific skills with which students struggle
- Participate in PLC groups aimed at helping students interact with ELA in an effective manner
- Coordinated with administration on curriculum design to meet the EOC schedule
- Create culturally relevant lessons for diverse learners (recent immigrants to the USA, Hispanic, African American, etc.)
- Design engaging lessons intimately connected to the real world and real-life application to allow students to use skills in a meaningful way
- Modify lessons to suit the needs of various learners (ELs, 504s, IEPs, etc.)
- Support students, parents, and fellow staff members upon the move to online learning, utilizing various platforms like Canvas, Google Classroom, and others to facilitate the process all around
- Participate in continuing education training to hone skills for ELs, students with learning disabilities, academically gifted, online presence, etc.

“English for Everybody” Project Teaching Assistant

January 2019-June 2019

Lograto, Lombardia, Italia

- Revitalized the English curriculum by creating engaging projects and real-world usage of language with students just beginning to engage with the English language
- Supported local Italian teachers with their lesson plans, projects, and activities for children aged 8-15
- Provided feedback to the betterment of the exchange program through which I was given the job to improve quality of experience for teachers as well as efficacy of the native teachers' lessons to students
- Created meaningful relationships with students to foster a love of diverse cultures and backgrounds from students all over the world, in Italy, and in the United States

First Future Online ESL

June 2018-January 2019

Based in Beijing, China and Manila, Philippines

- Modified lessons to suit the specific learners with which I was presented to make sure the students were being given appropriate challenges based on their levels
- Coordinated with R&D groups to better lesson plans and change less effective areas of pedagogical practice
- Attended team meetings with supervisors to discuss student development and activities
- Provided daily feedback for each student based on his/her progress in the class, areas in which s/he could improve, and gratification for their efforts during lessons

Al's Burger Shack

June 2013-July 2016

516 W Franklin St. Chapel Hill, NC 27514

- Trained new employees with POS, customer management, and line work within restaurant
- Created relationships with customers to create a friendly environment for return customers
